New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering and creating problems for residents in our community

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense.

Lost and abandoned cats and kittens are:

- **suffering from lack of basic care** - clean water and adequate food. They are unhealthy and often suffer from chronic dehydration, starvation, constipation, tooth decay, and untreated flea and worm infestations. Consequently, most are weak and vulnerable and carry contagious diseases such as cat flu and feline aids.
- **spreading diseases to our pets** - they frequently get into fights and cause injuries to our pet cats and kittens. This creates unnecessary and expensive vet bills, which many people cannot afford. If the cat or kitten is lucky it will survive, many suffer and eventually die, unless they receive immediate vet care.
- **creating a nuisance** - they come into our homes, through doors and open windows, day and night - residents can't leave their windows open in the summer because cats sneak into their homes.
- **eating our pets' food** - creating additional pet food expenses
- **stealing people's food** from kitchen benches and tables - creating additional food bills
- **causing flea infestations** - in our carpets, which residents have to pay to be treated
- **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens
- **breeding in our garages and garden sheds**
- **dying under our homes in inaccessible places** - creating a revolting smell which can last months
- **spraying inside our homes** - damaging carpets and furniture and causing a disgusting smell that is very difficult to remove
- **spraying on fences and outside walls** - creating a gross smell all year round

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu. These people know the cats have no future and there is no help available.

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. They no longer lend humane live capture traps for catching semi-wild or simply scared pet cats. They do not accept 'stray' cats from the community any more. This means the number of 'lost' cats and kittens will rapidly escalate.

I would like the WDC to help solve this problem:

1. **Introduce new *bylaws* mandating that all companion cats are de-sexed, microchipped and registered by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in our community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

1. Suffering:

- from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries

2. Victims of a disturbing range of cruelty and abuse

3. Creating a nuisance and problems for residents:

- spreading diseases to pets – such as cat flu and feline aids
- getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
- breeding in garages, garden sheds and under homes damaging the insulation

4. A health and hygiene issue:

- eating pets' food, and stealing people's food from kitchen benches and tables
- causing flea infestations in carpets, and skin infections from flea bites
- interrupting sleep – when fighting and mating
- dying under homes in inaccessible places – creating a revolting smell
- spraying inside homes – damaging carpets and furniture
- spraying on fences and outside walls – creating a gross smell all year round
- leaving faeces in gardens – a health hazard for young children
- carry toxoplasmosis – contagious to immune comprised people

5. Creating daily anxiety and distress in kind and caring residents:

- who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
- who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
- who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost'/'stray' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. The SPCA no longer lends humane live capture traps for catching semi-wild or simply scared pet cats. The SPCA do not accept 'stray' cats from the community any more. This means the number of 'lost'/'stray' cats and kittens will rapidly escalate. Since Covid 19 the SPCA has further reduced its services. The SPCA vets and SPCA inspectors are only working weekdays 9am-5pm.

I would like the WDC to help solve this problem:

1. **Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered (on NZCAR the NZ Companion Animal Register) by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in the community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

WHANGAREI
DISTRICT COUNCIL

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

1. Suffering:

- from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries

2. Victims of a disturbing range of cruelty and abuse

3. Creating a nuisance and problems for residents:

- spreading diseases to pets – such as cat flu and feline aids
- getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
- breeding in garages, garden sheds and under homes damaging the insulation

4. A health and hygiene issue:

- eating pets' food, and stealing people's food from kitchen benches and tables
- causing flea infestations in carpets, and skin infections from flea bites
- interrupting sleep – when fighting and mating
- dying under homes in inaccessible places – creating a revolting smell
- spraying inside homes – damaging carpets and furniture
- spraying on fences and outside walls – creating a gross smell all year round
- leaving faeces in gardens – a health hazard for young children
- carry toxoplasmosis – contagious to immune comprised people

5. Creating daily anxiety and distress in kind and caring residents:

- who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
- who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
- who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. They no longer lend humane live capture traps for catching semi-wild or simply scared pet cats. They do not accept 'stray' cats from the community any more. This means the number of 'lost' cats and kittens will rapidly escalate.

I would like the WDC to help solve this problem:

1. **Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered** (on NZCAR the NZ Companion Animal Register) **by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in the community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

WHANGAREI
DISTRICT COUNCIL

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

- 1. Suffering:**
 - from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries
- 2. Victims of a disturbing range of cruelty and abuse**
- 3. Creating a nuisance and problems for residents:**
 - spreading diseases to pets – such as cat flu and feline aids
 - getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
 - breeding in garages, garden sheds and under homes damaging the insulation
- 4. A health and hygiene issue:**
 - eating pets' food, and stealing people's food from kitchen benches and tables
 - causing flea infestations in carpets, and skin infections from flea bites
 - interrupting sleep – when fighting and mating
 - dying under homes in inaccessible places – creating a revolting smell
 - spraying inside homes – damaging carpets and furniture
 - spraying on fences and outside walls – creating a gross smell all year round
 - leaving faeces in gardens – a health hazard for young children
 - carry toxoplasmosis – contagious to immune comprised people
- 5. Creating daily anxiety and distress in kind and caring residents:**
 - who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
 - who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
 - who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost'/'stray' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. The SPCA no longer lends humane live capture traps for catching semi-wild or simply scared pet cats. The SPCA do not accept 'stray' cats from the community any more. This means the number of 'lost'/'stray' cats and kittens will rapidly escalate. Since Covid 19 the SPCA has further reduced its services. The SPCA vets and SPCA inspectors are only working weekdays 9am-5pm.

I would like the WDC to help solve this problem:

1. **Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered (on NZCAR the NZ Companion Animal Register) by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in the community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering and creating problems for residents in our community

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense.

Lost and abandoned cats and kittens are:

- **suffering from lack of basic care** - clean water and adequate food. They are unhealthy and often suffer from chronic dehydration, starvation, constipation, tooth decay, and untreated flea and worm infestations. Consequently, most are weak and vulnerable and carry contagious diseases such as cat flu and feline aids.
- **spreading diseases to our pets** - they frequently get into fights and cause injuries to our pet cats and kittens. This creates unnecessary and expensive vet bills, which many people cannot afford. If the cat or kitten is lucky it will survive, many suffer and eventually die, unless they receive immediate vet care.
- **creating a nuisance** - they come into our homes, through doors and open windows, day and night - residents can't leave their windows open in the summer because cats sneak into their homes.
- **eating our pets' food** - creating additional pet food expenses
- **stealing people's food** from kitchen benches and tables - creating additional food bills
- **causing flea infestations** - in our carpets, which residents have to pay to be treated
- **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens
- **breeding in our garages and garden sheds**
- **dying under our homes in inaccessible places** - creating a revolting smell which can last months
- **spraying inside our homes** - damaging carpets and furniture and causing a disgusting smell that is very difficult to remove
- **spraying on fences and outside walls** - creating a gross smell all year round

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu. These people know the cats have no future and there is no help available.

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

1. Suffering:

- from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries

2. Victims of a disturbing range of cruelty and abuse

3. Creating a nuisance and problems for residents:

- spreading diseases to pets – such as cat flu and feline aids
- getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
- breeding in garages, garden sheds and under homes damaging the insulation

4. A health and hygiene issue:

- eating pets' food, and stealing people's food from kitchen benches and tables
- causing flea infestations in carpets, and skin infections from flea bites
- interrupting sleep – when fighting and mating
- dying under homes in inaccessible places – creating a revolting smell
- spraying inside homes – damaging carpets and furniture
- spraying on fences and outside walls – creating a gross smell all year round
- leaving faeces in gardens – a health hazard for young children
- carry toxoplasmosis – contagious to immune comprised people

5. Creating daily anxiety and distress in kind and caring residents:

- who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
- who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
- who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost'/'stray' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. The SPCA no longer lends humane live capture traps for catching semi-wild or simply scared pet cats. The SPCA do not accept 'stray' cats from the community any more. This means the number of 'lost'/'stray' cats and kittens will rapidly escalate. Since Covid 19 the SPCA has further reduced its services. The SPCA vets and SPCA inspectors are only working weekdays 9am-5pm.

I would like the WDC to help solve this problem:

1. **Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered (on NZCAR the NZ Companion Animal Register) by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in the community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering and creating problems for residents in our community

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense.

Lost and abandoned cats and kittens are:

- **suffering from lack of basic care** - clean water and adequate food. They are unhealthy and often suffer from chronic dehydration, starvation, constipation, tooth decay, and untreated flea and worm infestations. Consequently, most are weak and vulnerable and carry contagious diseases such as cat flu and feline aids.
- **spreading diseases to our pets** - they frequently get into fights and cause injuries to our pet cats and kittens. This creates unnecessary and expensive vet bills, which many people cannot afford. If the cat or kitten is lucky it will survive, many suffer and eventually die, unless they receive immediate vet care.
- **creating a nuisance** - they come into our homes, through doors and open windows, day and night - residents can't leave their windows open in the summer because cats sneak into their homes.
- **eating our pets' food** - creating additional pet food expenses
- **stealing people's food** from kitchen benches and tables - creating additional food bills
- **causing flea infestations** - in our carpets, which residents have to pay to be treated
- **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens
- **breeding in our garages and garden sheds**
- **dying under our homes in inaccessible places** - creating a revolting smell which can last months
- **spraying inside our homes** - damaging carpets and furniture and causing a disgusting smell that is very difficult to remove
- **spraying on fences and outside walls** - creating a gross smell all year round

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu. These people know the cats have no future and there is no help available.

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. They no longer lend humane live capture traps for catching semi-wild or simply scared pet cats. They do not accept 'stray' cats from the community any more. This means the number of 'lost' cats and kittens will rapidly escalate.

I would like the WDC to help solve this problem:

1. **Introduce new *bylaws* mandating that all companion cats are de-sexed, microchipped and registered by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in our community. New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

1. Suffering:

- from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries

2. Victims of a disturbing range of cruelty and abuse

3. Creating a nuisance and problems for residents:

- spreading diseases to pets – such as cat flu and feline aids
- getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
- breeding in garages, garden sheds and under homes damaging the insulation

4. A health and hygiene issue:

- eating pets' food, and stealing people's food from kitchen benches and tables
- causing flea infestations in carpets, and skin infections from flea bites
- interrupting sleep – when fighting and mating
- dying under homes in inaccessible places – creating a revolting smell
- spraying inside homes – damaging carpets and furniture
- spraying on fences and outside walls – creating a gross smell all year round
- leaving faeces in gardens – a health hazard for young children
- carry toxoplasmosis – contagious to immune compromised people

5. Creating daily anxiety and distress in kind and caring residents:

- who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
- who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
- who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. DISTRICT COUNCIL

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

1. Suffering:

- from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries

2. Victims of a disturbing range of cruelty and abuse

3. Creating a nuisance and problems for residents:

- spreading diseases to pets – such as cat flu and feline aids
- getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
- breeding in garages, garden sheds and under homes damaging the insulation

4. A health and hygiene issue:

- eating pets' food, and stealing people's food from kitchen benches and tables
- causing flea infestations in carpets, and skin infections from flea bites
- interrupting sleep – when fighting and mating
- dying under homes in inaccessible places – creating a revolting smell
- spraying inside homes – damaging carpets and furniture
- spraying on fences and outside walls – creating a gross smell all year round
- leaving faeces in gardens – a health hazard for young children
- carry toxoplasmosis – contagious to immune comprised people

5. Creating daily anxiety and distress in kind and caring residents:

- who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
- who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
- who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost'/'stray' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. The SPCA no longer lends humane live capture traps for catching semi-wild or simply scared pet cats. The SPCA do not accept 'stray' cats from the community any more. This means the number of 'lost'/'stray' cats and kittens will rapidly escalate. Since Covid 19 the SPCA has further reduced its services. The SPCA vets and SPCA inspectors are only working weekdays 9am-5pm.

I would like the WDC to help solve this problem:

1. **Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered** (on NZCAR the NZ Companion Animal Register) **by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in the community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering and creating problems for residents in our community

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense.

Lost and abandoned cats and kittens are:

- **suffering from lack of basic care** - clean water and adequate food. They are unhealthy and often suffer from chronic dehydration, starvation, constipation, tooth decay, and untreated flea and worm infestations. Consequently, most are weak and vulnerable and carry contagious diseases such as cat flu and feline aids.
- **spreading diseases to our pets** - they frequently get into fights and cause injuries to our pet cats and kittens. This creates unnecessary and expensive vet bills, which many people cannot afford. If the cat or kitten is lucky it will survive, many suffer and eventually die, unless they receive immediate vet care.
- **creating a nuisance** - they come into our homes, through doors and open windows, day and night - residents can't leave their windows open in the summer because cats sneak into their homes.
- **eating our pets' food** - creating additional pet food expenses
- **stealing people's food** from kitchen benches and tables - creating additional food bills
- **causing flea infestations** - in our carpets, which residents have to pay to be treated
- **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens
- **breeding in our garages and garden sheds**
- **dying under our homes in inaccessible places** - creating a revolting smell which can last months
- **spraying inside our homes** - damaging carpets and furniture and causing a disgusting smell that is very difficult to remove
- **spraying on fences and outside walls** - creating a gross smell all year round

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu. These people know the cats have no future and there is no help available.

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens.  - who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
 - who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
 - who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost'/'stray' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. The SPCA no longer lends humane live capture traps for catching semi-wild or simply scared pet cats. The SPCA do not accept 'stray' cats from the community any more. This means the number of 'lost'/'stray' cats and kittens will rapidly escalate. Since Covid 19 the SPCA has further reduced its services. The SPCA vets and SPCA inspectors are only working weekdays 9am-5pm.

I would like the WDC to help solve this problem:

1. **Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered** (on NZCAR the NZ Companion Animal Register) **by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in the community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering and creating problems for residents in our community

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense.

Lost and abandoned cats and kittens are:

- **suffering from lack of basic care** - clean water and adequate food. They are unhealthy and often suffer from chronic dehydration, starvation, constipation, tooth decay, and untreated flea and worm infestations. Consequently, most are weak and vulnerable and carry contagious diseases such as cat flu and feline aids.
- **spreading diseases to our pets** - they frequently get into fights and cause injuries to our pet cats and kittens. This creates unnecessary and expensive vet bills, which many people cannot afford. If the cat or kitten is lucky it will survive, many suffer and eventually die, unless they receive immediate vet care.
- **creating a nuisance** - they come into our homes, through doors and open windows, day and night - residents can't leave their windows open in the summer because cats sneak into their homes.
- **eating our pets' food** - creating additional pet food expenses
- **stealing people's food** from kitchen benches and tables - creating additional food bills
- **causing flea infestations** - in our carpets, which residents have to pay to be treated
- **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens
- **breeding in our garages and garden sheds**
- **dying under our homes in inaccessible places** - creating a revolting smell which can last months
- **spraying inside our homes** - damaging carpets and furniture and causing a disgusting smell that is very difficult to remove
- **spraying on fences and outside walls** - creating a gross smell all year round

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu. These people know the cats have no future and there is no help available.

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

1. Suffering:

- from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries

2. Victims of a disturbing range of cruelty and abuse

3. Creating a nuisance and problems for residents:

- spreading diseases to pets – such as cat flu and feline aids
- getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
- breeding in garages, garden sheds and under homes damaging the insulation

4. A health and hygiene issue:

- eating pets' food, and stealing people's food from kitchen benches and tables
- causing flea infestations in carpets, and skin infections from flea bites
- interrupting sleep – when fighting and mating
- dying under homes in inaccessible places – creating a revolting smell
- spraying inside homes – damaging carpets and furniture
- spraying on fences and outside walls – creating a gross smell all year round
- leaving faeces in gardens – a health hazard for young children
- carry toxoplasmosis – contagious to immune comprised people

5. Creating daily anxiety and distress in kind and caring residents:

- who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
- who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
- who know these cats have no future and there is no help available

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu. These people know the cats have no future and there is no help available.

16 MAR 2021

WHANGAREI
DISTRICT COUNCIL

Submission for WDC 2021 Public Consultation Process

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering and creating problems for residents in our community

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense.

Lost and abandoned cats and kittens are:

SCANNED

- **suffering from lack of basic care** - clean water and adequate food. They are unhealthy and often suffer from chronic dehydration, starvation, constipation, tooth decay, and untreated flea and worm infestations. Consequently, most are weak and vulnerable and carry contagious diseases such as cat flu and feline aids.
- **spreading diseases to our pets** - they frequently get into fights and cause injuries to our pet cats and kittens. This creates unnecessary and expensive vet bills, which many people cannot afford. If the cat or kitten is lucky it will survive, many suffer and eventually die, unless they receive immediate vet care.
- **creating a nuisance** - they come into our homes, through doors and open windows, day and night - residents can't leave their windows open in the summer because cats sneak into their homes.
- **eating our pets' food** - creating additional pet food expenses
- **stealing people's food** from kitchen benches and tables - creating additional food bills
- **causing flea infestations** - in our carpets, which residents have to pay to be treated
- **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens
- **breeding in our garages and garden sheds**
- **dying under our homes in inaccessible places** - creating a revolting smell which can last months
- **spraying inside our homes** - damaging carpets and furniture and causing a disgusting smell that is very difficult to remove
- **spraying on fences and outside walls** - creating a gross smell all year round

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu. These people know the cats have no future and there is no help available.

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. They no longer lend humane live capture traps for catching semi-wild or simply scared pet cats. They do not accept 'stray' cats from the community any more. This means the number of 'lost' cats and kittens will rapidly escalate.

I would like the WDC to help solve this problem:

1. **Introduce new *bylaws* mandating that all companion cats are de-sexed, microchipped and registered by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in our community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

WHANGAREI
DISTRICT COUNCIL

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

SCANNED

1. Suffering:

- from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries

2. Victims of a disturbing range of cruelty and abuse

3. Creating a nuisance and problems for residents:

- spreading diseases to pets – such as cat flu and feline aids
- getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
- breeding in garages, garden sheds and under homes damaging the insulation

4. A health and hygiene issue:

- eating pets' food, and stealing people's food from kitchen benches and tables
- causing flea infestations in carpets, and skin infections from flea bites
- interrupting sleep – when fighting and mating
- dying under homes in inaccessible places – creating a revolting smell
- spraying inside homes – damaging carpets and furniture
- spraying on fences and outside walls – creating a gross smell all year round
- leaving faeces in gardens – a health hazard for young children
- carry toxoplasmosis – contagious to immune comprised people

5. Creating daily anxiety and distress in kind and caring residents:

- who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
- who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
- who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost'/'stray' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. The SPCA no longer lends humane live capture traps for catching semi-wild or simply scared pet cats. The SPCA do not accept 'stray' cats from the community any more. This means the number of 'lost'/'stray' cats and kittens will rapidly escalate. Since Covid 19 the SPCA has further reduced its services. The SPCA vets and SPCA inspectors are only working weekdays 9am-5pm.

I would like the WDC to help solve this problem:

1. **Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered (on NZCAR the NZ Companion Animal Register) by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in the community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering and creating problems for residents in our community

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense.

Lost and abandoned cats and kittens are:

- **suffering from lack of basic care** - clean water and adequate food. They are unhealthy and often suffer from chronic dehydration, starvation, constipation, tooth decay, and untreated flea and worm infestations. Consequently, most are weak and vulnerable and carry contagious diseases such as cat flu and feline aids.
- **spreading diseases to our pets** - they frequently get into fights and cause injuries to our pet cats and kittens. This creates unnecessary and expensive vet bills, which many people cannot afford. If the cat or kitten is lucky it will survive, many suffer and eventually die, unless they receive immediate vet care.
- **creating a nuisance** - they come into our homes, through doors and open windows, day and night - residents can't leave their windows open in the summer because cats sneak into their homes.
- **eating our pets' food** - creating additional pet food expenses
- **stealing people's food** from kitchen benches and tables - creating additional food bills
- **causing flea infestations** - in our carpets, which residents have to pay to be treated
- **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens
- **breeding in our garages and garden sheds**
- **dying under our homes in inaccessible places** - creating a revolting smell which can last months
- **spraying inside our homes** - damaging carpets and furniture and causing a disgusting smell that is very difficult to remove
- **spraying on fences and outside walls** - creating a gross smell all year round

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu. These people know the cats have no future and there is no help available.

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in our community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering and creating problems for residents in our community

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense.

Lost and abandoned cats and kittens are:

- **suffering from lack of basic care** - clean water and adequate food. They are unhealthy and often suffer from chronic dehydration, starvation, constipation, tooth decay, and untreated flea and worm infestations. Consequently, most are weak and vulnerable and carry contagious diseases such as cat flu and feline aids.
- **spreading diseases to our pets** - they frequently get into fights and cause injuries to our pet cats and kittens. This creates unnecessary and expensive vet bills, which many people cannot afford. If the cat or kitten is lucky it will survive, many suffer and eventually die, unless they receive immediate vet care.
- **creating a nuisance** - they come into our homes, through doors and open windows, day and night - residents can't leave their windows open in the summer because cats sneak into their homes.
- **eating our pets' food** - creating additional pet food expenses
- **stealing people's food** from kitchen benches and tables - creating additional food bills
- **causing flea infestations** - in our carpets, which residents have to pay to be treated
- **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens
- **breeding in our garages and garden sheds**
- **dying under our homes in inaccessible places** - creating a revolting smell which can last months
- **spraying inside our homes** - damaging carpets and furniture and causing a disgusting smell that is very difficult to remove
- **spraying on fences and outside walls** - creating a gross smell all year round

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu. These people know the cats have no future and there is no help available.

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. They no longer lend humane live capture traps for catching semi-wild or simply scared pet cats. They do not accept 'stray' cats from the community any more. This means the number of 'lost' cats and kittens will rapidly escalate.

I would like the WDC to help solve this problem:

1. **Introduce new *bylaws* mandating that all companion cats are de-sexed, microchipped and registered by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in our community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

DISTRICT COUNCIL

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

SCANNED

1. Suffering:

- from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries

2. Victims of a disturbing range of cruelty and abuse

3. Creating a nuisance and problems for residents:

- spreading diseases to pets – such as cat flu and feline aids
- getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
- breeding in garages, garden sheds and under homes damaging the insulation

4. A health and hygiene issue:

- eating pets' food, and stealing people's food from kitchen benches and tables
- causing flea infestations in carpets, and skin infections from flea bites
- interrupting sleep – when fighting and mating
- dying under homes in inaccessible places – creating a revolting smell
- spraying inside homes – damaging carpets and furniture
- spraying on fences and outside walls – creating a gross smell all year round
- leaving faeces in gardens – a health hazard for young children
- carry toxoplasmosis – contagious to immune comprised people

5. Creating daily anxiety and distress in kind and caring residents:

- who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
- who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
- who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. They no longer lend humane live capture traps for catching semi-wild or simply scared pet cats. They do not accept 'stray' cats from the community any more. This means the number of 'lost' cats and kittens will rapidly escalate.

I would like the WDC to help solve this problem:

- 1. Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered** (on NZCAR the NZ Companion Animal Register) **by 6 months of age - a once in the cat's lifetime cost.**
- 2. Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in the community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

WHANGAREI
DISTRICT COUNCIL

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

SCANNED

1. Suffering:

- from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries

2. Victims of a disturbing range of cruelty and abuse

3. Creating a nuisance and problems for residents:

- spreading diseases to pets – such as cat flu and feline aids
- getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
- breeding in garages, garden sheds and under homes damaging the insulation

4. A health and hygiene issue:

- eating pets' food, and stealing people's food from kitchen benches and tables
- causing flea infestations in carpets, and skin infections from flea bites
- interrupting sleep – when fighting and mating
- dying under homes in inaccessible places – creating a revolting smell
- spraying inside homes – damaging carpets and furniture
- spraying on fences and outside walls – creating a gross smell all year round
- leaving faeces in gardens – a health hazard for young children
- carry toxoplasmosis – contagious to immune comprised people

5. Creating daily anxiety and distress in kind and caring residents:

- who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
- who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
- who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost'/'stray' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. The SPCA no longer lends humane live capture traps for catching semi-wild or simply scared pet cats. The SPCA do not accept 'stray' cats from the community any more. This means the number of 'lost'/'stray' cats and kittens will rapidly escalate. Since Covid 19 the SPCA has further reduced its services. The SPCA vets and SPCA inspectors are only working weekdays 9am-5pm.

I would like the WDC to help solve this problem:

1. **Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered (on NZCAR the NZ Companion Animal Register) by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in the community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering and creating problems for residents in our community

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense.

Lost and abandoned cats and kittens are:

SCANNED

- **suffering from lack of basic care** - clean water and adequate food. They are unhealthy and often suffer from chronic dehydration, starvation, constipation, tooth decay, and untreated flea and worm infestations. Consequently, most are weak and vulnerable and carry contagious diseases such as cat flu and feline aids.
- **spreading diseases to our pets** - they frequently get into fights and cause injuries to our pet cats and kittens. This creates unnecessary and expensive vet bills, which many people cannot afford. If the cat or kitten is lucky it will survive, many suffer and eventually die, unless they receive immediate vet care.
- **creating a nuisance** - they come into our homes, through doors and open windows, day and night - residents can't leave their windows open in the summer because cats sneak into their homes.
- **eating our pets' food** - creating additional pet food expenses
- **stealing people's food** from kitchen benches and tables - creating additional food bills
- **causing flea infestations** - in our carpets, which residents have to pay to be treated
- **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens
- **breeding in our garages and garden sheds**
- **dying under our homes in inaccessible places** - creating a revolting smell which can last months
- **spraying inside our homes** - damaging carpets and furniture and causing a disgusting smell that is very difficult to remove
- **spraying on fences and outside walls** - creating a gross smell all year round

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu. These people know the cats have no future and there is no help available.

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. They no longer lend humane live capture traps for catching semi-wild or simply scared pet cats. They do not accept 'stray' cats from the community any more. This means the number of 'lost' cats and kittens will rapidly escalate.

I would like the WDC to help solve this problem:

1. **Introduce new *bylaws* mandating that all companion cats are de-sexed, microchipped and registered by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.**
Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in our community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Submission for WDC 2021 Public Consultation Process

RECEIVED - CUSTOMER SERVICES
16 MAR 2021
WHANGAREI
DISTRICT COUNCIL

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

SCANNED

1. Suffering:

- from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries

2. Victims of a disturbing range of cruelty and abuse

3. Creating a nuisance and problems for residents:

- spreading diseases to pets – such as cat flu and feline aids
- getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
- breeding in garages, garden sheds and under homes damaging the insulation

4. A health and hygiene issue:

- eating pets' food, and stealing people's food from kitchen benches and tables
- causing flea infestations in carpets, and skin infections from flea bites
- interrupting sleep – when fighting and mating
- dying under homes in inaccessible places – creating a revolting smell
- spraying inside homes – damaging carpets and furniture
- spraying on fences and outside walls – creating a gross smell all year round
- leaving faeces in gardens – a health hazard for young children
- carry toxoplasmosis – contagious to immune comprised people

5. Creating daily anxiety and distress in kind and caring residents:

- who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
- who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
- who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost'/'stray' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. The SPCA no longer lends humane live capture traps for catching semi-wild or simply scared pet cats. The SPCA do not accept 'stray' cats from the community any more. This means the number of 'lost'/'stray' cats and kittens will rapidly escalate. Since Covid 19 the SPCA has further reduced its services. The SPCA vets and SPCA inspectors are only working weekdays 9am-5pm.

I would like the WDC to help solve this problem:

1. **Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered (on NZCAR the NZ Companion Animal Register) by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in the community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering and creating problems for residents in our community

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense.

Lost and abandoned cats and kittens are:

SCANNED

- **suffering from lack of basic care** - clean water and adequate food. They are unhealthy and often suffer from chronic dehydration, starvation, constipation, tooth decay, and untreated flea and worm infestations. Consequently, most are weak and vulnerable and carry contagious diseases such as cat flu and feline aids.
- **spreading diseases to our pets** - they frequently get into fights and cause injuries to our pet cats and kittens. This creates unnecessary and expensive vet bills, which many people cannot afford. If the cat or kitten is lucky it will survive, many suffer and eventually die, unless they receive immediate vet care.
- **creating a nuisance** - they come into our homes, through doors and open windows, day and night - residents can't leave their windows open in the summer because cats sneak into their homes.
- **eating our pets' food** - creating additional pet food expenses
- **stealing people's food** from kitchen benches and tables - creating additional food bills
- **causing flea infestations** - in our carpets, which residents have to pay to be treated
- **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens
- **breeding in our garages and garden sheds**
- **dying under our homes in inaccessible places** - creating a revolting smell which can last months
- **spraying inside our homes** - damaging carpets and furniture and causing a disgusting smell that is very difficult to remove
- **spraying on fences and outside walls** - creating a gross smell all year round

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu. These people know the cats have no future and there is no help available.

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. They no longer lend humane live capture traps for catching semi-wild or simply scared pet cats. They do not accept 'stray' cats from the community any more. This means the number of 'lost' cats and kittens will rapidly escalate.

I would like the WDC to help solve this problem:

1. **Introduce new *bylaws* mandating that all companion cats are de-sexed, microchipped and registered by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.**
Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in our community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

DISTRICT COUNCIL

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

1. Suffering:

- from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries

2. Victims of a disturbing range of cruelty and abuse

3. Creating a nuisance and problems for residents:

- spreading diseases to pets – such as cat flu and feline aids
- getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
- breeding in garages, garden sheds and under homes damaging the insulation

4. A health and hygiene issue:

- eating pets' food, and stealing people's food from kitchen benches and tables
- causing flea infestations in carpets, and skin infections from flea bites
- interrupting sleep – when fighting and mating
- dying under homes in inaccessible places – creating a revolting smell
- spraying inside homes – damaging carpets and furniture
- spraying on fences and outside walls – creating a gross smell all year round
- leaving faeces in gardens – a health hazard for young children
- carry toxoplasmosis – contagious to immune compromised people

5. Creating daily anxiety and distress in kind and caring residents:

- who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
- who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
- who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost'/'stray' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. The SPCA no longer lends humane live capture traps for catching semi-wild or simply scared pet cats. The SPCA do not accept 'stray' cats from the community any more. This means the number of 'lost'/'stray' cats and kittens will rapidly escalate. Since Covid 19 the SPCA has further reduced its services. The SPCA vets and SPCA inspectors are only working weekdays 9am-5pm.

I would like the WDC to help solve this problem:

1. **Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered** (on NZCAR the NZ Companion Animal Register) **by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in the community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering and creating problems for residents in our community

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense.

Lost and abandoned cats and kittens are:

SCANNED

- **suffering from lack of basic care** - clean water and adequate food. They are unhealthy and often suffer from chronic dehydration, starvation, constipation, tooth decay, and untreated flea and worm infestations. Consequently, most are weak and vulnerable and carry contagious diseases such as cat flu and feline aids.
- **spreading diseases to our pets** - they frequently get into fights and cause injuries to our pet cats and kittens. This creates unnecessary and expensive vet bills, which many people cannot afford. If the cat or kitten is lucky it will survive, many suffer and eventually die, unless they receive immediate vet care.
- **creating a nuisance** - they come into our homes, through doors and open windows, day and night - residents can't leave their windows open in the summer because cats sneak into their homes.
- **eating our pets' food** - creating additional pet food expenses
- **stealing people's food** from kitchen benches and tables - creating additional food bills
- **causing flea infestations** - in our carpets, which residents have to pay to be treated
- **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu. These people know the cats have no future and there is no help available.

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. They no longer lend humane live capture traps for catching semi-wild or simply scared pet cats. They do not accept 'stray' cats from the community any more. This means the number of 'lost' cats and kittens will rapidly escalate.

I would like the WDC to help solve this problem:

1. **Introduce new *bylaws* mandating that all companion cats are de-sexed, microchipped and registered by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.**
Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in our community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

WHANGAREI
DISTRICT COUNCIL

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

SCANNED

- 1. Suffering:**
 - from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries
- 2. Victims of a disturbing range of cruelty and abuse**
- 3. Creating a nuisance and problems for residents:**
 - spreading diseases to pets – such as cat flu and feline aids
 - getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
 - breeding in garages, garden sheds and under homes damaging the insulation
- 4. A health and hygiene issue:**
 - eating pets' food, and stealing people's food from kitchen benches and tables
 - causing flea infestations in carpets, and skin infections from flea bites
 - interrupting sleep – when fighting and mating
 - dying under homes in inaccessible places – creating a revolting smell
 - spraying inside homes – damaging carpets and furniture
 - spraying on fences and outside walls – creating a gross smell all year round
 - leaving faeces in gardens – a health hazard for young children
 - carry toxoplasmosis – contagious to immune comprised people
- 5. Creating daily anxiety and distress in kind and caring residents:**
 - who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
 - who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
 - who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost'/'stray' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. The SPCA no longer lends humane live capture traps for catching semi-wild or simply scared pet cats. The SPCA do not accept 'stray' cats from the community any more. This means the number of 'lost'/'stray' cats and kittens will rapidly escalate. Since Covid 19 the SPCA has further reduced its services. The SPCA vets and SPCA inspectors are only working weekdays 9am-5pm.

I would like the WDC to help solve this problem:

1. **Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered (on NZCAR the NZ Companion Animal Register) by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in the community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering and creating problems for residents in our community

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense.

Lost and abandoned cats and kittens are:

SCANNED

- **suffering from lack of basic care** - clean water and adequate food. They are unhealthy and often suffer from chronic dehydration, starvation, constipation, tooth decay, and untreated flea and worm infestations. Consequently, most are weak and vulnerable and carry contagious diseases such as cat flu and feline aids.
- **spreading diseases to our pets** - they frequently get into fights and cause injuries to our pet cats and kittens. This creates unnecessary and expensive vet bills, which many people cannot afford. If the cat or kitten is lucky it will survive, many suffer and eventually die, unless they receive immediate vet care.
- **creating a nuisance** - they come into our homes, through doors and open windows, day and night - residents can't leave their windows open in the summer because cats sneak into their homes.
- **eating our pets' food** - creating additional pet food expenses
- **stealing people's food** from kitchen benches and tables - creating additional food bills
- **causing flea infestations** - in our carpets, which residents have to pay to be treated
- **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens
- **breeding in our garages and garden sheds**
- **dying under our homes in inaccessible places** - creating a revolting smell which can last months
- **spraying inside our homes** - damaging carpets and furniture and causing a disgusting smell that is very difficult to remove
- **spraying on fences and outside walls** - creating a gross smell all year round

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens

WHANGAREI
DISTRICT COUNCIL

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

SCANNED

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

1. Suffering:

- from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries

2. Victims of a disturbing range of cruelty and abuse

3. Creating a nuisance and problems for residents:

- spreading diseases to pets – such as cat flu and feline aids
- getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
- breeding in garages, garden sheds and under homes damaging the insulation

4. A health and hygiene issue:

- eating pets' food, and stealing people's food from kitchen benches and tables
- causing flea infestations in carpets, and skin infections from flea bites
- interrupting sleep – when fighting and mating
- dying under homes in inaccessible places – creating a revolting smell
- spraying inside homes – damaging carpets and furniture
- spraying on fences and outside walls – creating a gross smell all year round
- leaving faeces in gardens – a health hazard for young children
- carry toxoplasmosis – contagious to immune comprised people

5. Creating daily anxiety and distress in kind and caring residents:

- who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
- who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
- who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost'/'stray' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. The SPCA no longer lends humane live capture traps for catching semi-wild or simply scared pet cats. The SPCA do not accept 'stray' cats from the community any more. This means the number of 'lost'/'stray' cats and kittens will rapidly escalate. Since Covid 19 the SPCA has further reduced its services. The SPCA vets and SPCA inspectors are only working weekdays 9am-5pm.

I would like the WDC to help solve this problem:

1. **Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered (on NZCAR the NZ Companion Animal Register) by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in the community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering and creating problems for residents in our community

SCANNED

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense.

Lost and abandoned cats and kittens are:

- **suffering from lack of basic care** - clean water and adequate food. They are unhealthy and often suffer from chronic dehydration, starvation, constipation, tooth decay, and untreated flea and worm infestations. Consequently, most are weak and vulnerable and carry contagious diseases such as cat flu and feline aids.
- **spreading diseases to our pets** - they frequently get into fights and cause injuries to our pet cats and kittens. This creates unnecessary and expensive vet bills, which many people cannot afford. If the cat or kitten is lucky it will survive, many suffer and eventually die, unless they receive immediate vet care.
- **creating a nuisance** - they come into our homes, through doors and open windows, day and night - residents can't leave their windows open in the summer because cats sneak into their homes.
- **eating our pets' food** - creating additional pet food expenses
- **stealing people's food** from kitchen benches and tables - creating additional food bills
- **causing flea infestations** - in our carpets, which residents have to pay to be treated
- **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens
- **breeding in our garages and garden sheds**
- **dying under our homes in inaccessible places** - creating a revolting smell which can last months
- **spraying inside our homes** - damaging carpets and furniture and causing a disgusting smell that is very difficult to remove
- **spraying on fences and outside walls** - creating a gross smell all year round

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu. These people know the cats have no future and there is no help available.

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. They no longer lend humane live capture traps for catching semi-wild or simply scared pet cats. They do not accept 'stray' cats from the community any more. This means the number of 'lost' cats and kittens will rapidly escalate.

I would like the WDC to help solve this problem:

1. **Introduce new *bylaws* mandating that all companion cats are de-sexed, microchipped and registered by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in our community. New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

SCANNED

Lost and abandoned cats and kittens are:

1. Suffering:

- from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries

2. Victims of a disturbing range of cruelty and abuse

3. Creating a nuisance and problems for residents:

- spreading diseases to pets – such as cat flu and feline aids
- getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
- breeding in garages, garden sheds and under homes damaging the insulation

4. A health and hygiene issue:

- eating pets' food, and stealing people's food from kitchen benches and tables
- causing flea infestations in carpets, and skin infections from flea bites
- interrupting sleep – when fighting and mating
- dying under homes in inaccessible places – creating a revolting smell
- spraying inside homes – damaging carpets and furniture
- spraying on fences and outside walls – creating a gross smell all year round
- leaving faeces in gardens – a health hazard for young children
- carry toxoplasmosis – contagious to immune comprised people

5. Creating daily anxiety and distress in kind and caring residents:

- who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
- who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
- who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost'/'stray' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. The SPCA no longer lends humane live capture traps for catching semi-wild or simply scared pet cats. The SPCA do not accept 'stray' cats from the community any more. This means the number of 'lost'/'stray' cats and kittens will rapidly escalate. Since Covid 19 the SPCA has further reduced its services. The SPCA vets and SPCA inspectors are only working weekdays 9am-5pm.

I would like the WDC to help solve this problem:

1. **Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered** (on NZCAR the NZ Companion Animal Register) **by 6 months of age - a once in the cat's lifetime cost.**

DISTRICT COUNCIL

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

1. Suffering:

- from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries

2. Victims of a disturbing range of cruelty and abuse

3. Creating a nuisance and problems for residents:

- spreading diseases to pets – such as cat flu and feline aids
- getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
- breeding in garages, garden sheds and under homes damaging the insulation

4. A health and hygiene issue:

- eating pets' food, and stealing people's food from kitchen benches and tables
- causing flea infestations in carpets, and skin infections from flea bites
- interrupting sleep – when fighting and mating
- dying under homes in inaccessible places – creating a revolting smell
- spraying inside homes – damaging carpets and furniture
- spraying on fences and outside walls – creating a gross smell all year round
- leaving faeces in gardens – a health hazard for young children
- carry toxoplasmosis – contagious to immune comprised people

5. Creating daily anxiety and distress in kind and caring residents:

- who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
- who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
- who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost'/'stray' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. The SPCA no longer lends humane live capture traps for catching semi-wild or simply scared pet cats. The SPCA do not accept 'stray' cats from the community any more. This means the number of 'lost'/'stray' cats and kittens will rapidly escalate. Since Covid 19 the SPCA has further reduced its services. The SPCA vets and SPCA inspectors are only working weekdays 9am-5pm.

I would like the WDC to help solve this problem:

1. **Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered (on NZCAR the NZ Companion Animal Register) by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in the community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering and creating problems for residents in our community

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense.

Lost and abandoned cats and kittens are:

- **suffering from lack of basic care** - clean water and adequate food. They are unhealthy and often suffer from chronic dehydration, starvation, constipation, tooth decay, and untreated flea and worm infestations. Consequently, most are weak and vulnerable and carry contagious diseases such as cat flu and feline aids.
- **spreading diseases to our pets** - they frequently get into fights and cause injuries to our pet cats and kittens. This creates unnecessary and expensive vet bills, which many people cannot afford. If the cat or kitten is lucky it will survive, many suffer and eventually die, unless they receive immediate vet care.
- **creating a nuisance** - they come into our homes, through doors and open windows, day and night - residents can't leave their windows open in the summer because cats sneak into their homes.
- **eating our pets' food** - creating additional pet food expenses
- **stealing people's food** from kitchen benches and tables - creating additional food bills
- **causing flea infestations** - in our carpets, which residents have to pay to be treated
- **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens
- **breeding in our garages and garden sheds**
- **dying under our homes in inaccessible places** - creating a revolting smell which can last months
- **spraying inside our homes** - damaging carpets and furniture and causing a disgusting smell that is very difficult to remove
- **spraying on fences and outside walls** - creating a gross smell all year round

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu. These people know the cats have no future and there is no help available.

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. DISTRICT COUNCIL

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering from starvation and cruelty; damaging our environment; and creating problems for residents and businesses in our community.

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense for residents and businesses, and damage to native wildlife.

Lost and abandoned cats and kittens are:

1. Suffering:

- from chronic dehydration, starvation, constipation, tooth decay, flea and worm infestations, disease and untreated injuries

2. Victims of a disturbing range of cruelty and abuse

3. Creating a nuisance and problems for residents:

- spreading diseases to pets – such as cat flu and feline aids
- getting into fights and causing injuries to pets - creating unnecessary and expensive vet bills
- breeding in garages, garden sheds and under homes damaging the insulation

4. A health and hygiene issue:

- eating pets' food, and stealing people's food from kitchen benches and tables
- causing flea infestations in carpets, and skin infections from flea bites
- interrupting sleep – when fighting and mating
- dying under homes in inaccessible places – creating a revolting smell
- spraying inside homes – damaging carpets and furniture
- spraying on fences and outside walls – creating a gross smell all year round
- leaving faeces in gardens – a health hazard for young children
- carry toxoplasmosis – contagious to immune comprised people

5. Creating daily anxiety and distress in kind and caring residents:

- who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food
- who have sick, malnourished and sometimes injured adult and juvenile cats hanging around, many with eye infections from untreated cat flu
- who know these cats have no future and there is no help available

6. Damaging our environment:

- predating on native species - birds, small mammals, lizards and insects
- competing with native species for food and water resources
- spreading diseases such as toxoplasmosis

7. Creating a nuisance for business owners:

- shoppers seeing starving cats and kittens eating out of rubbish bins
- employees taking time off work to take boxes of kittens found at their workplace to the SPCA
- cats breeding out the back of cafes, restaurants and supermarkets

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost'/'stray' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. The SPCA no longer lends humane live capture traps for catching semi-wild or simply scared pet cats. The SPCA do not accept 'stray' cats from the community any more. This means the number of 'lost'/'stray' cats and kittens will rapidly escalate. Since Covid 19 the SPCA has further reduced its services. The SPCA vets and SPCA inspectors are only working weekdays 9am-5pm.

I would like the WDC to help solve this problem:

1. **Introduce new bylaws mandating that all companion cats are de-sexed, microchipped and registered (on NZCAR the NZ Companion Animal Register) by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in the community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. - **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens
- **breeding in our garages and garden sheds**
- **dying under our homes in inaccessible places** - creating a revolting smell which can last months
- **spraying inside our homes** - damaging carpets and furniture and causing a disgusting smell that is very difficult to remove
- **spraying on fences and outside walls** - creating a gross smell all year round

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu. These people know the cats have no future and there is no help available.

The SPCA prioritises sick and injured animals and is not obligated to accept 'lost' cats and kittens. In January 2019, the Whangarei SPCA removed both their 'drop in' boxes for dogs/puppies and cats/kittens for out of hours use. They no longer lend humane live capture traps for catching semi-wild or simply scared pet cats. They do not accept 'stray' cats from the community any more. This means the number of 'lost' cats and kittens will rapidly escalate.

I would like the WDC to help solve this problem:

1. **Introduce new *bylaws* mandating that all companion cats are de-sexed, microchipped and registered by 6 months of age - a once in the cat's lifetime cost.**
2. **Provide and financially contribute to subsidised de-sexing, microchipping and registering programmes throughout year for people on low incomes.** Some councils in NZ already provide this service by working with their local vet clinics and/or SPCA.

Over time, both these measures would help reduce the number of lost and abandoned cats and kittens in our community. Mandatory de-sexing would also reduce the number of unwanted cats and kittens taken to cat shelters. Mandatory microchipping and registering would enable many lost cats and kittens to be reunited with their owners.

New bylaws and resources urgently needed for the management of 'lost' and abandoned cats and kittens that are suffering and creating problems for residents in our community

I am a resident in the Whangarei district. I am aware that people in all suburbs have problems with 'lost' and abandoned cats and kittens, whether it be one or two cats or colonies of 20-30. These unowned and unwanted cats and kittens create many different problems and cause unnecessary anxiety, work and expense.

Lost and abandoned cats and kittens are:

- **suffering from lack of basic care** - clean water and adequate food. They are unhealthy and often suffer from chronic dehydration, starvation, constipation, tooth decay, and untreated flea and worm infestations. Consequently, most are weak and vulnerable and carry contagious diseases such as cat flu and feline aids.
- **spreading diseases to our pets** - they frequently get into fights and cause injuries to our pet cats and kittens. This creates unnecessary and expensive vet bills, which many people cannot afford. If the cat or kitten is lucky it will survive, many suffer and eventually die, unless they receive immediate vet care.
- **creating a nuisance** - they come into our homes, through doors and open windows, day and night - residents can't leave their windows open in the summer because cats sneak into their homes.
- **eating our pets' food** - creating additional pet food expenses
- **stealing people's food** from kitchen benches and tables - creating additional food bills
- **causing flea infestations** - in our carpets, which residents have to pay to be treated
- **causing skin infections in children from flea bites** - creating the need for extra doctor's visits and medication from the pharmacy, and causing distress to children and family members
- **interrupting our sleep** - when fighting and mating at night under and outside our properties
- **breeding under our homes and damaging insulation** - when female cats use under floor insulation as a safe place to raise young kittens
- **breeding in our garages and garden sheds**
- **dying under our homes in inaccessible places** - creating a revolting smell which can last months
- **spraying inside our homes** - damaging carpets and furniture and causing a disgusting smell that is very difficult to remove
- **spraying on fences and outside walls** - creating a gross smell all year round

- **leaving faeces in our gardens – a health hazard where young children often play**
- **causing some frustrated residents to get rid of them in cruel ways** in their attempt to clear their homes and properties of unwanted and unowned cats and kittens
- **creating daily anxiety and distress in kind and caring residents** who hate seeing tiny, vulnerable, kittens that are skinny and starving, often with the mother cat desperately looking for food. Other sick, malnourished and sometimes injured adult and juvenile cats are also hanging around, many with eye infections from untreated cat flu.
